### To Whom It May Concern

It is a great pleasure for me to introduce Mr. **Asfi Rahman** who graduated in Software Engineering from the Department of Computer Science and Engineering at the Islamic University of Technology in May 2023 with a CGPA of 3.17. He has known me for about two years as one of my undergraduate students. He got admission to the Islamic University of Technology through a tough country-based admission test, in which only candidates who passed the high school exam with high standing points get the chance to compete, and a few can pursue their undergraduate degree.

During his undergraduate level, I taught him different courses such as Design Patterns (SWE 4501), Embedded Software Development (SWE 4739), and Embedded Software Development Lab (SWE 4740) wherein he secured 70%, 70%, and 80% marks respectively. As his course teacher, I had the opportunity to observe his thirst for knowledge, integrity of character, ability for clear reasoning, and strong analytical aptitude. His curiosity and level of thinking were well-developed and excellent. In a small or full group discussion, he was an actively participating student and made valuable contributions to group discussions. His analytical ability and sense of reasoning always impressed me very much.

His interpersonal skills are marked by his friendly and cordial approach toward his fellows in the lab and are characterized by a high level of maturity. He is quite capable of handling responsibilities in any position. He is capable of undertaking software projects, and I am sure that he can perform at his best as a member of a team. During undergraduate period, he created several desktop and web application projects.

Mr. Asfi is a very amiable person and has excellent communication skills. I found him to be proficient in English, being able to convey his ideas lucidly and with great ease. His courteous and lively nature makes it a pleasure to interact with him. Mr. Asfi Rahman possesses leadership qualities that have shone brightly throughout his time as my student. He has consistently demonstrated the ability to lead and inspire his peers, whether in group projects or during his involvement in organizing co-curricular events. Specifically, he served as a Programming Event Management Executive at the IUT Computer Society (IUTCS) and was a valued member co-ordinator of the organizing team for ICT FEST.

I do believe that he has all the potential to excel in his higher studies with self-confidence and intellectual ability. Therefore, I strongly recommend him for admission to your university with full financial assistance. I wish him all the best in his future endeavors.
